In the first half of 2007, Luka Koper d.d. generated $€ 56$ million in operating revenues, which is a 13 percent increase on the same period in 2006.

The company also recorded positive trends in cargo throughput, which amounted to 7.7 million tonnes and is a year-on increase of 6 percent. The largest growth in cargo throughput volume was recorded in container freight ( $40 \%$ ) and vehicles (19\%).

Operating profits amounting to $€ 11.8$ million were 19 percent ahead of the levels recorded in the first half of 2006. Net profit for the six-month period amounted to $€ 14.9$ million, thus exceeding the January to June 2006 results by 55 percent.

Profitability deriving from performance is corroborated by value added per employee which in the first six-months of 2007 amounted to $€ 43,300$, a year-on rise of 10 percent. Net profit per employee amounted to $€ 19,800$, 44 percent ahead of the previous year.

As of $30^{\text {th }}$ June 2007, return on equity amounted $8.5 \%$, which is nearly 30 percent up on the previous year's equivalent period.

In the first half of 2007, Luka Koper d.d. considerably surpassed expectations as regards all key business indicators, hence it can be seen that the set business objectives are being accomplished.

## Significant Events - January to June 2007

This year Luka Koper d.d. is celebrating its $50^{\text {th }}$ anniversary. The company has overseen half a century of expansion and growth, and thus a small local port developed into an important player in the European maritime market. Year after year Koper has handled increasing volumes of cargo, corroborating its status as a key entrepôt for the markets of Central Europe. But this anniversary is also a year of much activity and many challenges lie ahead as a result of the ambitious goals which have been set: ongoing growth in cargo throughput, an improved structure of services as well as ever better financial results.

In March 2007, the newly established Adria Terminali d.o.o. became the latest addition to the Luka Koper Group. In 100-percent ownership of the parent company, Adria Terminali operates real estate and plant at a new inland terminal in Sežana near the Italian border. In accordance with Luka Kopełs development strategy, it is anticipated that this new enterprise will gradually develop into a European regional distribution centre which will facilitate the advancement of a transport logistics centre network as well as represent the backbone of the company's logistics system.

Together with the multinational Trade Trans Invest and the Hungarian company MAV Kombi, Luka Koper d.d. has signed a joint letter of intent for the co-construction of a container terminal in Curtici, a strategically important railway junction in Romania which lies near its border and main railway crossing with Hungary.

On $22^{\text {nd }}$ March 2007, Luka Koper d.d. signed a contract with the Istrabenz holding company for the sale of its 26-percent stake in Actual I.T. d.o.o.; and despite Luka Koper's retreat from ownership, Actual I.T shall continue to provide the company with information technology support services.

In Argentina the President of Luka Koper Management Board and CEO of the Establecimiento Santa Bárbara S.A., signed a letter of intent on business co-operation in the development of the Port of Mar del Plata, as well as the fostering of shipping logistics links and cargo transfers between the two ports.

In April 2007 Luka Koper d.d. sold 44,279 shares (8.3\% of total Banka Koper d.d. capital) to Intesa Sanpaolo S.p.A.. Following this disposal Luka Koper d.d. holds a $1.67 \%$ stake in Banka Koper d.d.

On $28^{\text {th }}$ May 2007, Luka Koper d.d. hosted a celebration upon the establishment of a new logistics provider POS-ESDC d.o.0 - the POSCO Europe Steel Distribution Centre - jointly founded by three Korean enterprises (POSCO, Daewoo Logistics and Daewoo International) in conjunction with Luka Koper d.d. The new company, in which Luka Koper d.d. holds a ten percent stake, is to develop Koper and Sežana as a distribution facility for Korean steel manufactures destined for the countries of Central and Eastern Europe.

## Relevant Post-Balance-Sheet Events

On $19^{\text {th }}$ July 2007, Luka Koper Management provided the Supervisory Board with information on the company's performance over the first half of 2007. At this same regular meeting Mr Marko Starman, President of the Supervisory Board, tendered his resignation, while Mr Boris Popovič was appointed as the new Board President by the members.

Further to this, the annual General Assembly of Luka Koper d.d. also took place on $19^{\text {th }}$ July 2007. At this meeting shareholders:

- were presented with the 2006 Annual Report, as well as the Supervisory Board Report;
- adopted the proposal as to the apportionment of distributable profit for 2006;
- endorsed the operations of the Management and Supervisory Boards for 2006;
- determined the attendance fees of the President and members of the Supervisory Board;
- appointed Deloitte Revizija d.o.o., Dunajska 9, Ljubljana, Slovenia, as the 2007 external auditor for the financial statements and operations of both Luka Koper d.d. and Luka Koper Group;
- adopted the proposal on the transformation of participating preference no-par-value shares with limited voting rights into the ordinary no-par-value shares;
- adopted the proposal as to changes to the company Statute;
- upon a proposal by the Government of the Republic of Slovenia, appointed Mr Marjan Bezjak and Ms Olga Franca to the company's Supervisory Board on a four-year mandate as shareholder's representatives.

Challenging actions were anticipated.

## Committed Capital

Luka Koper d.d. holds no resolutions as to the commitment of capital.

## Conditional Share Capital Increase

Luka Koper d.d. holds no resolutions as to any increase in share capital.

## Interim Performance

During the first half of 2007, Luka Koper d.d. was managed by a four-member Management Board. The composition of both the Management and Supervisory Boards underwent no changes during this period.

The operating revenues of the parent company account for 92 percent of Luka Koper Group revenues, and due to the fact that other items pertaining to the financial statements of the parent company significantly affect the financial statements of the Group, its operations and performance simultaneously provide a fair degree of insight into the performance of the Group as a whole during the first-half of 2007.

Operating revenues amounted to $€ 56$ million over the first six months of 2007, some 13 percent up on the equivalent period in 2006, as well as 4 percent ahead of projections. 91 percent of all revenues were generated through terminal operations, whilst business is not particularly affected by season variation or time of year.

Cargo throughput amounted to 7.7 million tonnes in the January to June 2007 period, which is a 6 percent increase on 2006 levels.

Cargo handled during the first six months encompassed 147,000 TEUs (containers) which is 40 percent above the level recorded in the first half of 2006. The 230,530 vehicles handled is a year-on increase of 19 percent. Further to this, both container and vehicle throughput were well ahead - respectively 30 percent and 11 percent - of the ambitious objectives set forth in the Luka Koper business plan.

Figure 3: Structure of tonnage throughput of cargo, January to June 2007

The structure of throughput by cargo type reveals the predominant portion of dry bulk cargos, though this pre-eminence is gradually diminishing over time. Significant growth may be observed as regards container freight and general cargo throughput.

The structure of throughput by European country of origin or destination exhibits increases in the volumes pertaining to Slovenia (domestic market) as well as for Austria and Hungary (transhipment cargos), respectively Slovenia's northern and eastern neighbours.

Figure 4: The structure of cargo throughput by European country of origin or destination, January June 2007

The year-on growth in operating revenues stood at 13 percent, whilst operating expenses amounted to $€ 44.2$ million, which is just 11 percent above January to June 2006 levels and 12 percent ahead of projections. The structure of operating expenses does not change considerably over time.

Figure 5: Structure of operating expenses January - June 2007

The major portion of service costs can be attributed to the operations of terminals and are directly related to the volume of cargo being handled. Key cost categories also encompass revaluation adjustments, of which the most important item amount-wise is depreciation. Such depreciation costs are ahead of the same period in 2006, and are also attributable to real-estate investment (namely Sežana) as well as intensive investments in handling equipment.

Return on sales (ROS) for January to June 2007 reveals that through the realisation of $€ 100$ in sales the company generated $€ 21.10$ in operating profit, which is a 6 percent year-on increase over the same period last year. Also the indicator of value added per employee, which in the first half of 2007 amounted to $€ 43,300$, corroborates an annual growth trend of some 10 percent.

During the first half of 2007 the company generated $€ 7.5$ million in financial revenues, which is 178 percent ahead of the 2006 level. The major portion of financial revenues can be attributed to the disposal of financial investments; special mention should be made of stock in Banka Koper d.d.. Other financial revenues encompass dividends and participatory revenues from other equity investments, revenues arising from exchange rate differences as well as interest revenues. Financial expenses between January and June 2007 amounted to $€ 1$ million, which is a year-on rise of 18 percent. The major portion of financial expenses can be attributed to interest expenses pertinent to loans taken out by the company.
$€ 42$ million was allocated for investments in tangible fixed assets and real-estate during the first six months of 2007, which is 51 percent of the anticipated amount for the whole year. Investments in realestate - in particular at Sežana - account for the major portion, while most of the remainder was used for the purchase of equipment for terminals.

Net profit generated in the first half of 2007 amounted to $€ 14.9$ million, which is a year-on increase of 55 percent, and 9 percent ahead of expectations.

As to the assets structure, the major portion (88\%) encompasses fixed assets which are entirely financed by long-term sources. Equity to liabilities ratio also continues to improve and declined by 5 percentage points over the last year to 79 percent, which is indicative of continuing improvement in the structure of sources of financing.

Current assets exceed short-term liabilities by 53 percent, meaning that the company is well capable of financing its business operations.

Return on equity (ROE), revealing the ratio between net profit and the average balance of equity herein recalculated to an annual level to provide a better indication - is 34 percent ahead of 2006 levels.

## Financial Statements of the Group with Notes

The complete consolidated and non-consolidated financial statements, respectively pertaining to the Luka Koper Group of companies and the parent company Luka Koper d.d., are complied in accordance with International Financial Reporting Standards. These non-audited financial statements refer to the January to June 2007 period and encompass the following:

- Income Statement
- Balance Sheet Statement
- Cash Flow Statement, and
- Statement of Changes in Equity

The consolidated financial statements for the first time encompass the newly established company Adria Terminali d.o.o., which began operations in March 2007.

Net earnings per share is calculated as a ratio between net profit for the accounting period, reduced by any net profit attributable to minority interests, divided by the number of ordinary shares.

Diluted earnings per share includes all shares in the denominator, i.e. participating preference and ordinary shares in Luka Koper d.d..

In the first six months of 2007, The Luka Koper Group increased sales revenues by 16 percent above the second half of 2006. Operating costs were up by 12 percent, whilst operating profits increased by 17 percent.

The Luka Koper Group generated a net profit of 21.2 million euros during the first six months of 2007, which is a 98 percent increase on the same period in 2006. This significant increase can in part be attributed to the partial sale of Luka Koper's investment in Banka Koper d.d., as well as the favourable performance of associated enterprises.

Fixed assets account for 88 percent of all assets and are fully financed by long-term assets. 48 percent of the balance-sheet total is encompassed by tangible fixed assets together with real estate investments, the relative year-on increase of which can be attributed to a round of intensive investment, in particular at the new inland terminal at Sežana. Long-term financial investments, which given the favourable stock market - increase over time, account for a further 40 percent of the balancesheet total.

The portion of equity in the Luka Koper Group balance sheet total gradually decreases; as of $30^{\text {th }}$ June 2007 it amounted to 78 percent. As a result, there is an increase in debts and liabilities; the portion of long-term and short-term liabilities in the balance sheet total was 2 percent ahead of the level recorded as of $31^{\text {st }}$ December 2006.

Current assets within the Group balance sheet total considerably exceed short-term liabilities, hence the levels of working capital are more than adequate.
